

Jonathan M. Steward

Email: Jonathan.steward16@gmail.com

Summary

Senior Cyber Risk Analyst with 7+ years of experience in information security leading and supporting enterprise initiatives. Proven success building and operationalizing programs aligned with ISO 27001, NIST CSF, NIST RMF, and ISO 27005 including control implementation, policy development, and risk management. Adept at integrating risk frameworks within ServiceNow IRM environments. Skilled in translating complex technical risks into actionable, business-aligned insights for executive stakeholders. Certified in CRISC, ISO/IEC 27001 Lead Auditor, and Security Awareness (Proofpoint).

Experience

Atmus Filtration Technologies (Formerly Cummins Filtration)

Senior Cybersecurity Governance, Risk, and Compliance (GRC) Analyst

August 2022 – Present

- Serve as global governance, risk, and compliance (GRC) lead
- Developed risk assessment methodology in ServiceNow IRM platform to align with ISO 27001, NIST RMF, and regulatory requirements
- Lead cross-functional enterprise-wide cybersecurity risk assessments aligned with ISO 27001 and NIST RMF
- Automated GRC Processes with code to improve internal processes
- Develop and drive risk mitigation strategies and action plans in coordination with business stakeholders in alignment with business objectives
- Developed AI risk management strategy and process for assessing AI risks in alignment with Legal and Privacy
- Maintain global risk register and developed key performance indicators (KPIs) and key risk indicators (KRIs) for the GRC program for continuous monitoring
- Present risk trends and metrics to leadership for informed decision-making and awareness
- Lead identification and remediation of external attack surface risks in coordination with business stakeholders to reduce risk by 80%
- Partnered with compliance to ensure alignment with regulatory requirements and industry standards
- Drive ISO 27001 Information Security Management System (ISMS) implementation including developing statement of applicability, risk assessment methodology, objectives, and risk treatment plans
- Led the cross-functional enterprise-wide deployment of DMARC authentication across 200+ domains
- Authored and reviewed policy, standard, and procedures to ensure alignment with business objectives and industry standards
- Built and operationalized the enterprise Third-Party Risk Management (TPRM) program and strategy reviewing 100+ vendors in coordination with Privacy and Legal teams and requirements
- Assess and manage vendor security risks across onboarding, contract renewal, and continuous monitoring phases
- Maintain centralized vendor repository and tracking of risk treatment plans
- Built and operationalized the security awareness and training program and strategy
- Deliver monthly enterprise phishing campaigns in alignment with current risk landscape
- Increased global training completion from 60% to 90% in one year to reduce human risk exposure
- Performed post incident reviews and root cause analysis for incidents and tabletop exercises
- Formalized incident reports for availability related incidents
- Mentored, coached, and managed junior GRC employees

UBS

Cyber Security Specialist (Authorized Officer) – Data Loss Prevention

June 2021 – August 2022

- Investigated data loss prevention alerts and potential data exfiltration incidents
- Partnered with Data Protection and Legal teams to remediate data security incidents
- Documented incident findings and root cause analysis recommendations
- Lead team process automation efforts using agile SDLC with Python to improve accuracy and efficiency

Deloitte

Cyber Security Analyst – Forensics and Insider Threat

October 2019 – June 2021

- Used investigative cyber techniques as part of the Insider Threat Program to assist in the investigation of suspicious employee behavior incidents to maintain data confidentiality

- Analyzed SIEM logs from Splunk queries to investigate employee behavior and support incident response
- Performed forensic analysis with Magnet AXIOM of imaged servers and created timeline reports to assist in incident response process
- Performed email message tracing to investigate email related data exfiltration incidents
- Automated team processes using scripting and application development (PowerShell, .NET Framework, .NET Core)

Associate Cyber Security Business Analyst

July 2019 – October 2019

- Facilitated the cyber security project requirements gathering process by working with project team and manager
- Analyzed network vulnerability scan data of critical firm assets

Certifications

- CRISC – Certified in Risk and Information Systems Control
- CISM – Certified Information Security Manager
- Mastermind ISO/IEC 27001:2022 Lead Auditor
- Proofpoint Certified Security Awareness Specialist

Leadership and Professional Service

Founding President – Nashville Chapter of GRC Engineering Club

August 2026 – Present

- Lead the Nashville Chapter focused on advancing GRC engineering, automation, technical governance, and professional development within the local cybersecurity community.

Certification Director – ISACA Middle Tennessee Chapter

June 2026 – Present

- Serve on the chapter executive board and lead certification-focused initiatives, exam preparation support, member education, and professional development activities.

Cybersecurity and Technology Mentor – Vanderbilt University the Wond'ry

May 2026 – Present

- Mentor students and professionals through career guidance, cybersecurity insight, and practical support for technical and professional development.

Projects

Automated AWS Continuous Monitoring & Evidence Collection Pipeline (Independent Project)

GitHub: [AWS Compliance Automation Code](#) | LinkedIn: [Article - Continuous Monitoring with AWS and Python](#)

Personal GRC engineering project designed to simulate a real-world enterprise need for automated cloud compliance monitoring and audit evidence generation.

- Mapped AWS Config rules to CIS v8 controls for real-time compliance status tracking
- Automated evidence collection and control updates via ServiceNow IRM APIs
- Implemented control indicators in ServiceNow IRM for automated compliance attestation
- Enabled continuous monitoring with weekly GitHub Action triggers and REST-based data sync
- Reduced manual audit prep and increased GRC workflow efficiency

Education

The George Washington University – *Master of Engineering, Cybersecurity Analytics*

Final GPA: 3.86

Vanderbilt University – *Bachelor of Science, Computer Science*
